DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. Acknowledgement of the information disclosure statement (IDS) submitted on 5-25-06 is being considered by the examiner.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-32 are rejected under 35 U.S.C. 102(b) as being anticipated by Shibasaki et al (US 5453727)

Regarding claims 1-32 Shibasaki et al teaches a supporting substrate 1; a sensor substrate having a lower surface on which a sensor section 3 for detecting pressure (fig. 15) is formed; and a sealing member (col. 6 lines 1-5) that is joined to an upper surface of the supporting substrate and the lower surface of the sensor substrate and forms a sealing space for sealing the sensor section between the substrates (col. 6 lines 1-10).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US documents 4773269, 688316, 2005/0174527 and disclose pressure sensors that contain protective layers for sensors.
